ALLEVYN◊ ADHESIVE
Foam Dressing

www.smith-nephew.com/allevyn

EXUDATE LEVEL

MODERATE TO HIGH ABSORBENCY

PRIMARY INDICATIONS

LEG ULCERS

PRESSURE ULCERS

SURGICAL WOUNDS

OTHER INDICATIONS

DIABETIC FOOT ULCERS

FIRST & SECOND DEGREE BURNS

DONOR SITES

SKIN TEARS

FUNGATING ULCERS

Can be used in conjunction with INTRASITE◊ GEL for necrotic or sloughy wounds.

ALLEVYN◊ ADHESIVE Dressings with our strongest adhesive and multi-way stretch are designed to stay in place.[1–5]

Features and benefits

ALLEVYN Range: absorbent, protective and gentle

ALLEVYN Foam Dressings are **absorbent, protective and gentle**, doing the basics you expect from a dressing and more.

Absorbent[6–8]
The hydrocellular foam core **innovatively balances absorption and retention** to create a moist wound healing environment[3,9–12] with minimised risk of maceration.*[3,9–11]

Protective[6,13]
The breathable, waterproof[6–8] top film **provides a bacterial barrier**[14] while the dressing remains intact.

Gentle[9,10]
The wound contact adhesives are **easy to apply and remove**[3,11,15,16] and are shown to **minimise pain and trauma** during dressing changes and skin inspection.[3,9]

ALLEVYN ADHESIVE

Secure adhesion
The low allergy/non-sensitising adhesive keeps the dressing **securely in place** without adhering to the wound.[17–20]

Multi-way stretch
Facilitates conformability and **helps to maximise patient comfort**.[1,3,18]

Cuttable*[21]
Available in a wide range of sizes which can be cut to fit awkward areas such as elbows and knees.[1,3,18,21,22]

*Cutting will compromise the bacterial barrier properties of the dressing.
†Cases, cartons and pouches compared to 2021 packaging dimensions.

Less waste + more care

Over 20% smaller packaging -20%

Our ALLEVYN ADHESIVE packaging is now 20% smaller.†[23]
